Main aim:
-> We are designing a professional Website

Part one: Building the foundation. (100 marks).

1. Plan the project.
   - define your target audience
   - Set your goals
   etc.
2. Research + Content gathering
   - do research that will benefit your project.
3. Create a HTML Structure.
   It must include
   - Header
   - Navigation
   - main content
   - footer
4. Organise your files

1. Pick your target organisation.
   { It can be real or made up.

   Non-profit
   Small Business ✓
   Retail Store

   Project goals:
   - Create a functional and visually appealing website that meets the needs of your target organisation

   Must be:
   - easy to navigate
   - informative
   - engaging.
2. Research and Proposal.

   2.1 Website Project proposal

   Submit 2 different proposals for 2 diff target organisations

   each proposal (300 - 500 words)

   formatting -> Refer to the word doc.

Proposal content

1. Organisation overview:
   - Name of the Organisation -> Shelflife + Cotton On.
   - A brief history of the organisation
   - Mission and Vission Statement
   - Target audience
2. Website Goals & objectives:
   - define specific goals for the website { eg, web traffic, sell products provide info, etc)
   - determine and present KPIs to measure success
3. Current website analysis {if applicable}:
   - Analyse Strengths + Weaknesses of the existing web.
   - Identify areas for improvement based on the weaknesss identified
4. Proposed Website features & functionality:
   - Outline essential features { eg, Homepage, about us, contact, products | services } and desired functionality.
5. Design and user experience:
   - Overall design aesthetic and Blanding and highlight the following:
     - colour scheme { Proposed colour palette.
     - typography { font choices and Hierachy
     - layout and design { Overall design
     - User experience considerations { eg, Navigation, layout etc
     - develop low-fidelity wireframes to visualise the website's layout and information hierachy
6. Technical Requirements:
   - Identify hosting and domain name requirements and programming languages and frame works { eg, HTML, CSS, JavaScript.
7. Timeline and Milestone
   - Create a realistic project timeline with key milestones that follow the timeline during the Subject Submission dates
8. Budget:
   - Estimate the budget for development, hosting and maintenance (while this is a series of assignments, the budget should reflect realistic amounts based on your research)
9. References:
   - The references listed here are unique to the organisation of your Choosing & the researched documentation of the website Project proposal
   { The references here will be used in completing P4.1 and will be compiled in the README.md doc in the repo for the whole PoE.

2.2 Submit two project proposals.
   - Create 2 proposals and Submit both

Proposal breakdown structure

Organisation choosen. (2).

1. Cotton On { Proposal 1.
2. Shelflife { Proposal 2.

Cotton On. {Proposal 1.

We will use Ve code. -> throughout

Cotton on's history

The founder, Nigel Austin started the Cotton on group with a vision. His vision was for the Aussie lifestyle to dominate the world.

The first market came and he made no sales but he was not demotivated and rather he Switched things up.

{ in 1988, that's where nigel had the idea of Selling denim jackets

in 1991, the first Standalone Cotton on retail opens in Geelong, offering affordable casual everyday fashion

Chosen Proposal {Pikachu's cafe.

* Part 1 breakdown. {html Skeleton Structure}

-> Create a Project proposal
   choosing between:
   - Non-Profit organisation
   - Small business {Pikachu's heaven.
   - Retail Store.

Project Goals: Creating a functional and Visually appealing website that meets the needs of your target organisation.

Website Should be:
- easy to navigate
- informative
- engaging.

-> Content research and Sourcing: * Refer to your Proposal

Chosen organisation.
Conduct research on the choosen organisation {Pikachu's Heaven} identify relevant content for each page.

- ~~Organisations website (if applicable)~~ No need
- Social media
- Public domain + Creative Resources. {use pinterest + Canva for images & google gemini + Chatgpt for inspo.
- Original content
  -> Product designs, event info etc.

File organisation.
- Separate project folder.
- Organise each content into Subfolders
- Use clear and consistent file naming conventions.

Website Structure and Planning.

4.1 Site map
4.2 File and Folder Structure.

4.1 Creating a visual representation of how the website will be structured. { incl, main pages + Hierarchal relationships.
-> Homepage
   About us
   Enquiry
   Consol

4.2 Create a well-organized file structure
Root (main) folder:
- Files: index.html / about.html, Services.html and/or products.html / Enquiry.html
  Contact.html
- Folders: css, js, images

HTML Structure & basic content

5.1 Creating HTML files for each page outlined in the Sitemap
5.2 Basic html Structure
5.3 Content Integration
5.4 Navigation
5.5 Testing and debugging
5.6 Comments.

5.1 Min 5 web pages are required. Any other pages must be documented in the relevant Sections, the README document, and the Submission)

5.2 Use proper Html tags and implement basic elements
-> (Header, nav, etc) -> (headings, paragraphs etc)

5.3 Integrate researched content into the files. Use proper html tags to format the content

5.4 Create a navigation menu (using html links) { the navigation links must function correctly across the entire set of webpages on the website

5.5 Test across different browsers to ensure cross-browser compatibility. Fix any errors or issues in the HTML code

5.6 Include comments that explain your code

focus on the GitHub repository & Submission requirements after building your Html.

We will have Something like this later:

Pikachu's-Heaven/
- index.html
- Menu.html
- Spaces.html
- Reservations.html
- Contact.html
- images/
- CSS/
- js/

-> "Content research"

A. Business information -> turn some proposal ideas into reality.
B. Menu content -> create a menue & document your idea / inspiration
C. Cafe Spaces -> Pay attention to image licensing.
D. Images and other media
E. Sources & referencing

Source record

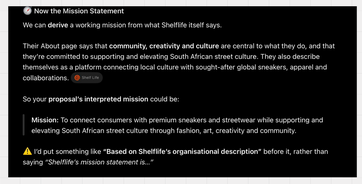

Content / Asset	Source (Pinterest / google gemini / etc.)	what we need it for.
Menu inspiration	Source	Menu ideas
Cafe layout inspo	Source	Space planning
image	Source	Website image
font	Source	Typography
